

Warren Branch Public Library Indianapolis, IN

The Warren Branch of the Indianapolis Public Library System was constructed in 1974. This 15,500 sqft facility is characterized by its tan brick and sloped metal roofs. Due to the changing use of the libraries an emphasis will be the technology throughout the facility. Additionally, the main entry has been relocated to provide direct access from the existing south parking area, including a new auto book drop. The style of the new entrance provides a contemporary update that is complimentary to the existing architectural language. New reconfigured public restrooms, new circulation desk, a new community activity space, new finishes and array of contemporary furniture will enhance the patron experience.

New South Entrance and Book
